For Houses Being Built In Flood Zone Areas

The regulation to build at or above the required flood elevation has been explained to me. I understand that areas below the required elevation may only be used for the parking of vehicles, building access (staircase or floodproofed elevators) and limited storage for equipment necessary for lawn or building maintenance. I further understand that should I violate any of these regulations I may be required to remove the enclosure, that my insurance carrier may be notified and that further remedy may be sought through the courts.

An elevation certificate is required upon completion of the slab before continuing up with the walls.

I have been explained and understand the regulations pursuant to the State of Georgia Water Quality Control Act, Title 12 Chapter 5- that **NO CONSTRUCTION** may occur within 25 feet of the marsh, 50 feet on waters designated as "trout streams", as delineated by the Georgia Department of Natural Resources. **These setbacks are considered permanent buffers** and shall remain in its natural and undisturbed state.
